Electrical technician of telecommunications
2011 - 2015

FACULTY OF ELECTRONIC ENGINEERING, UNIVERSITY OF NIS

Department of Control Systems
2015 - ONGOING

LANGUAGE

- Serbian
- English

EXPERIENCE

Future Proof Soft - Front End Developer October 2021 - ONGOING

During my time in Future-Proof Soft, I have successfully completed courses for [JavaScript](#), [HTML & CSS](#), [TypeScript](#), [ReactJs](#) & [NextJs](#), [Framer Motion](#) and [NodeJs](#).

After the completion, my mentors and I decided that ReactJS would be the best fit for me since I have a good eye for details.

I have been given different assignments such as Weather Forecast (ReactJs, TypeScript, MaterialUI), Official Company Website (ReactJs, TypeScript, Tailwind) where I gained practical experience in web development by debugging code, building user interfaces and implementing functionality.

After finishing the company website, I was assigned to their internal project (ReactJs, Typescript, Tailwind).

My latest work was for a local client who is selling wall panels. This was done by customizing Shopify theme. You can see the website [here](#)

SKILLS

- HTML
- CSS
- JavaScript
- TypeScript
- React
- NextJS
- Tailwind
- Material UI
- Git
- NodeJs
