SAVA TASIC

Front-End Developer

I stand out in my work environment because of my positive energy and I enjoy working both in team and individualy. I am thorough and always eager to explore new possibilities. I am always open to new challenges and opportunities for personal and professional growth.

EXPERIENCE

Future Proof Soft - Front End Developer October 2021 - ONGOING

During my time in Future-Proof Soft, I have successfully completed courses for <u>JavaScript</u>, <u>HTML & CSS</u>, <u>TypeScript</u>, <u>ReactJs & NextJs</u>, <u>Framer Motion</u> and <u>NodeJs</u>.

After the completion, my mentors and I decided that ReactJS would be the best fit for me since I have a good eye for details.

I have been given different assignments such as Weather Forecast (ReactJs, TypeScript, MaterialUI), Official Company Website (ReactJs, TypeScript, Tailwind) where I gained practical experience in web development by debugging code, building user interfaces and implementing functionality.

After finishing the company website, I was assigned to and still am working on their internal project (ReactJs, Typescript, Tailwind).

SKILLS

- HTML
- NextJS
- CSS

- Tailwind
- JavaScript
- Material UI
- TypeScript
- Git
- React
- NodeJs
